SOUTHERN BELL TELEPHONE AND TELEGRAPH CO.
INCORPORATED

OUT-OF-TOWN TELEPHONE RATES

Rates to points not listed below and information concerning initial period and overtime rates may be obtained by calling Long Distance. Night and Sunday rates apply from 6 P. M. to 4:30 A. M. and all day Sunday.

Rates quoted below do not include Federal Tax.

On calls under 25 cents, the Federal Tax is 15% of the total charges; on calls of 25 cents or over, the tax is 25% of the total charges.

On calls from Coin Box Telephones, the tax is computed to the nearest multiple of 5 cents.

On calls to points within Kentucky the State Tax is 3%.

Business Transactions With the Company

Our aim is to render a service that will be satisfactory to our customers, though difficulties will sometimes occur despite all of our efforts to avoid them. On page one information is shown regarding placing long distance calls, securing numbers not listed in the directory, reporting telephones out of order and making emergency calls. Other matters, including business transactions, should be taken up with the business office either by telephone, personal visit or letter.

BUSINESS OFFICE

804 College St., Bowling Green, Ky.

Telephone 9000. Business Hours, 8:30 A.M. to 5:00 P.M.—Mondays through Fridays. Closed on Saturdays.

A. J. MILLER, *Group Mgr.*

Telephones: 9000 *Ofc.*, 9080 *Res.*

Service Applications, Changes and Discontinuances

Applications for new service, changes, additions and discontinuance of service should be handled with our business office. A telephone call will enable you, in almost every case, to transact business promptly and satisfactorily.

Telephone Calls to the Business Office

Call Bowling Green-9000 and the representative who answers will gladly handle your business transactions.

Bills and Payments

Bills are rendered on the 1st of each month for local service in advance for a one month period from date of bill and long distance service for a one month period preceding the date of the bill. Bills may be paid by mail or in person at our business office, 804 College, Bowling Green, Ky.

There is a depository in the entrance of the building, for the convenience of customers wishing to pay bills before or after office hours and on Saturdays, Sundays and holidays.

How to Place Out-of-Town Calls

There are two general classes of Out-of-Town Calls, namely Station-to-Station and Person-to-Person, as explained below.

Station-to-Station Calls

(From One Telephone to Another)

A station-to-station call is one when you ask to be connected with a certain telephone in a distant place. However, if you ask for a particular person or for an extension telephone reached through a private branch exchange, as one in some department or hotel room, the call is a person-to-person call. A station-to-station call is completed more quickly and the rate is less than for a person-to-person call.

The time at the originating point when the conversation starts determines whether the day or night rate applies. Charges begin when the called telephone is answered provided the calling party is holding the line.

To Place a Station-to-Station Call

First—Give the operator the name of the place you are calling.

Second—The telephone number you are calling (if known), otherwise, the name and the address (if known) of the party whose telephone you are calling. For example: J. W. Brown's Residence—425 Main Street.

Third—Your telephone number when the operator asks for it.

Person-to-Person Calls

(From One Person to Another)

A person-to-person call is one when you ask for a particular person or extension telephone reached through a private branch exchange, as one in some department or hotel room. The rate for a person-to-person call is higher than the rate for a station-to-station call.

The time at the originating point when the conversation starts determines whether the day or night rate applies. The initial period is three minutes, after which charges for additional time apply. Charges begin when the called person or extension telephone reached through a private branch exchange is obtained, provided the calling party is holding the line. Charges may be reversed without any change in rate.

To Place a Person-to-Person Call

First—Give the operator the name of the place you are calling.

Second—The name and telephone number (if known) of the person you are calling, otherwise, the name and the address (if known) of the called party. For example: Mr. J. W. Brown, at telephone 2470, or Mr. J. W. Brown, at J. W. Brown's residence—425 Main Street.

Third—Your telephone number when the operator asks for it.

Charges for Initial Period, Overtime and Federal Taxes

Further information concerning charges for initial period, overtime, and Federal taxes may be obtained by calling Long Distance.

Collect Calls

If the charges on the call are to be paid at the distant telephone, you should tell the operator when filing the call that it is a "collect" call. The charges, if accepted at the distant telephone, will be billed to that telephone.

General Information

Tariffs

Tariffs which show rates, rules and regulations for telephone service and facilities are on file with the Regulatory Commissions having jurisdiction over such matters, and are available for public inspection at our business office.

Transmitting Messages

Employees of the Telephone Company are forbidden to accept oral or written messages to be transmitted by an employee over the lines of the Telephone Company.

Attachments to Telephones

To render satisfactory service, it is important that the Telephone Company furnish and maintain all apparatus and equipment connected with its lines. Except as provided in the Tariffs, no line, instrument, appliance or apparatus not furnished by the Telephone Company shall be connected with, attached to or in any way used in connection with facilities of the Telephone Company.

Recording of Telephone Conversations

A short "beep" tone heard over the telephone about every 15 seconds indicates that the person with whom you are talking is recording your conversation by means of his electrical recording machine connected to the line. The "beep" signal is produced automatically by a device which connects the recorder to the telephone line and which is provided by the Telephone Company for your protection.

Use of a recorder without this signal is unlawful. If you do not want a record made of what you are saying, ask the person with whom you are talking to disconnect his recording machine. When he disconnects his recorder, the signal is no longer heard.

Advertising Telephone Numbers

The advantages of showing telephone numbers on stationery, signs, cards, etc., are recognized, though the growth and changes in the city and the corresponding growth and arrangement of Telephone facilities may require the changing of telephone numbers. For this reason, stationery, signs, cards, etc., showing telephone numbers should not be printed in large quantities.

Telegrams by Telephone

You may telephone telegrams, cablegrams or radiograms to the Western Union Telegraph Co., and have the charges billed to your telephone account if you are a telephone subscriber. Just follow the instructions shown under the listing of this company in the directory.

Architects' and Builders' Service

When building or remodeling, you may arrange with your architect or builder to provide telephone outlets while construction is in progress. The Telephone Company will gladly advise with you, your architect or builder. Just call the Telephone Company and ask for "Architects' and Builders' Service."

Calls from a Party Line Where a Crank Is Used to Ring the Operator

Before ringing the Operator, remove the receiver and listen to make sure the line is not in use. To get the Operator, replace the receiver and turn the crank. When through talking, promptly hang up the receiver and turn the crank again so the Operator will clear your line for further use.

Telephone Directories

Loss of time and inconvenience by calling wrong numbers can be avoided if you consult the current directory before placing a call and avoid the use of obsolete directories.

Between directory issues certain numbers do not appear in the current directory due to changes and new installations. These numbers may be secured by calling "Information."

No binder, holder or auxiliary cover, except those furnished by the Company, shall be used in connection with any telephone directory.

Telephone directories of other cities in this and certain foreign countries can be obtained for our customers who need them. Prices, etc., may be secured by calling the business office.

How to Use the Dial Telephone

In Morgantown, Ky.

Listen for the Dial Tone

Before dialing, remove the receiver from the hook carefully. If you "jiggle" the hook you may get a wrong number. Listen for the dial tone—a steady "humming" sound which is usually heard immediately or within a few seconds after removing the receiver. The dial tone indicates that the equipment is ready for you to dial the number desired. Do not start to dial until you hear it.

If the dial tone is not heard within a short while, hang up your receiver, wait for a few seconds and try again. If the dial tone is not heard on the second attempt, it indicates that your line is in trouble and you should dial "Operator" from another telephone and report the trouble.

How to Dial

Suppose, for example, you want to dial 2341.

1. Place your finger firmly in the dial opening over the figure "2."
2. Turn the dial around to the right until your finger strikes the finger stop.
3. Then lift your finger clear of the dial and let it return to its original position.
4. Proceed in the same manner with the other figures "3," "4" and "1."

If, before you complete the dialing of a number, you find that you have made an error, or if your finger slips out of the opening before you have turned the dial around to the finger stop, hang up the receiver for a few seconds. Then remove it and upon hearing the dial tone proceed to dial the complete number again.

To dial "Operator" place your finger in the dial opening through which the word "Operator" is seen. Turn the dial around until your finger strikes the finger stop and release the dial. In a few seconds the operator will answer.

THE RINGING OR BUSY SIGNAL

After you have finished dialing, you should hear either the "ringing" or the "busy" signal within a few seconds.

The ringing signal is a "burring" sound heard at intervals after you have completed dialing, which indicates that the dialed telephone bell is ringing. If, after hearing this signal for one or two minutes, you obtain no response, it is evident that there is no one within hearing distance to answer.

The busy signal is a "buzz-buzz-buzz" sound heard after you have dialed, which indicates that the dialed line is busy. When this signal is heard and the number you dialed is not on your line, hang up the receiver and dial again a little later. If the number you dialed is the number of a subscriber on your line, hang up the receiver and wait for the ringing of your bell as described under "To Dial Another Party on Your Line."

If you do not hear either of these signals within half a minute, hang up the receiver for a few seconds, then remove it and dial the complete number again. If, after a second attempt, you do not hear either signal, dial "Operator" and report the condition to her.

TO DISCONNECT YOUR TELEPHONE AFTER DIALING

To release your telephone from the telephone you dialed, hang up the receiver.

Do not move the receiver hook or the dial while talking as this will break the connection.

If, after dialing a number, you wish to dial another number or to dial the same number again, first hang up the receiver for a few seconds. Then remove it and, as soon as the dial tone is heard, proceed to dial the number desired.

(E)

CALLS FROM PARTY LINE AND EXTENSION TELEPHONES

If there are other telephones on your line, always listen in the receiver before starting to dial so as to be sure the line is not in use. If the dial tone is not heard, ask if the line is being held, and, if no response is received, hang up the receiver for a few seconds and then make another attempt. However, should you hear successive clicks in your receiver, indicating that the other party on your line is dialing, wait until the dialing stops and then inform him that you have interfered with his call and that it will be necessary for him to dial the complete number again. Then replace your receiver on the hook.

If, during or after your dialing, you hear another party come in on the line, tell him that the line is in use and request him to hang up his receiver. If you have not finished dialing your number when the other party comes in on the line, after he hangs up, you should hang up your own receiver for a few seconds, then remove it, listen for the dial tone and, when it is heard, dial the complete number again.

TO DIAL ANOTHER PARTY ON YOUR LINE

If you are on a party line and wish to call another party on your line, dial the number in the regular way. All telephone numbers have four figures. The first three figures are alike for all parties on the same line. After you have finished dialing the number, you will hear the "busy" signal and should immediately hang up your receiver. Your bell, as well as the bell of the party you are calling, will then ring at brief intervals. When the called party answers, your bell will stop ringing. You should then lift your receiver and talk to the party answering.

If your bell does not stop ringing in from one to two minutes, it indicates that there is no one within hearing distance to answer the called telephone. You should then stop your bell from ringing and free the line from the connection by removing your receiver from the hook for a few seconds and then replacing it.

ON CALLS TO

LOGANSPOUT—dial 2301 and when the operator answers, give her the number desired.

LONG DISTANCE CALLS

For long distance calls, dial "Operator" and when she answers give her the necessary information and she will make the connection.

INFORMATION AND REPAIR SERVICE CALLS

To secure a number not listed in the directory or to report "telephone out of order," dial "Operator."

Every Day a Bigger Value...

TODAY YOU CAN CALL MORE PEOPLE THAN EVER BEFORE, AND
MORE PEOPLE CAN CALL YOU. AS TELEPHONE SERVICE GROWS,
SO GROWS ITS USEFULNESS AND VALUE

Give A Fellow TIME to ANSWER

A telephone ring is exciting! You never know what's waiting at the other end. That's why it's important to *answer calls promptly*. It's also important when you're doing the calling, to *allow time* for your party to reach the telephone. It's two-way telephone consideration that means better service all around.

Allow Time for Your Party to Answer

VOCAL ASSET — The "voice
with a smile" can be a real asset.
Haven't you often said of someone
who has just telephoned—"My, but
she has a pleasant voice." Or—"I
like to do business with them be-
cause they are so nice over the
telephone."

Government Offices—Federal
